

# RESOLUTE GUARD

Proactive Cybersecurity Risk Management

---

## Comprehensive Cybersecurity for School Districts, Community Colleges, and Local Governments Supported by OHESC

**Enterprise-Grade Cybersecurity for Public Entities—Without Complexity or High Costs.**

- **Tailored Cybersecurity Assessment & Planning** – Tailored for public entities, using intuitive tools for clear status visibility and progress tracking.
- **End-to-End Cybersecurity Implementation** – Flexible deployment approach to implement cybersecurity solutions to fit your needs and available resources.
- **Lower Cybersecurity Insurance Premiums** - By proactively managing risks and aligning with industry standards, we help reduce cybersecurity insurance costs while maintaining robust coverage.
- **Dedicated Cybersecurity Advisor** – Receive ongoing expert guidance from assessment to implementation and beyond.

---

## Protection Aligned with NIST Cybersecurity Framework

Based upon the current profile of your cyber posture, we recommend tailored solutions to meet your members specific needs. ResoluteGuard provides you with best-in-class product solutions at a fraction of the cost.

- Multi-Factor Authentication (MFA)
- Remote Monitoring & Management (RMM)
- Backup & Recovery
- Employee Awareness & Phishing Training
- Endpoint Security (EDR)
- Managed Detection & Response (MDR)
- Network Security
- Cloud Security
- Data Protection
- External Vulnerability Scans
- Penetration Testing
- Internal Network Scans
- Third Party Risk Management (TPRM)
- Network Security
- Cloud Security
- Data Protection & Encryption
- vCISO[Secure](#): SMART Cyber Action Plan

## vCISOSecure: Roadmap to Cybersecurity

ResoluteGuard's **vCISOSecure** is a unique cybersecurity risk management platform built specifically with public entities and ESC's in mind.

Your **SMART-Cyber Action Plan** is a customized roadmap tailored to your organization, prioritizing and addressing risk.

- Establishes cybersecurity risk scores as a baseline with dedicated ResoluteGuard **Cybersecurity Advisor** helping you build a customized plan to identify, mitigate, and manage risks.
- Pinpoint Gaps: Address weaknesses reflected in your risk scores.
- Align Resources: Customize your plan to fit governance, admin, and tech priorities.

# vCISOSecure: Roadmap to Cybersecurity

ResoluteGuard's **vCISOSecure** empowers administrators and technology teams with the tools to manage cyber risk.

- The **Cybersecurity Risk Dashboard** delivers clear risk scores to measure the maturity of your cybersecurity practices and track progress toward your goals.
- **Real-time updates** on tasks and risk scores keep you on target.
- **Risk Management Reporting Suite** provides detailed reports like Cyber Risk Scores & Cyber Insurance Reports for smarter decision-making.

# vCISO Secure: Roadmap to Cybersecurity

ResoluteGuard's **vCISOSecure** empowers administrators and technology teams with the tools to manage cyber risk.

- **Policy Templates-** 20+ pre-built templates to streamline compliance
- **Executive Risk Summaries-** Monthly reports for informed decision-making.
- **Budget with Confidence-** Collaborating with your finance team, prioritizing funds to protect digital assets, strengthen defenses, and mitigate threats—ensuring every dollar counts.

# FREE Cyber Readiness Check & Incident Response Plan

Quickly strengthen your cybersecurity posture — at no cost, with no obligation

## What's Included:

### 1:1 Cyber Readiness Check with an Expert Advisor

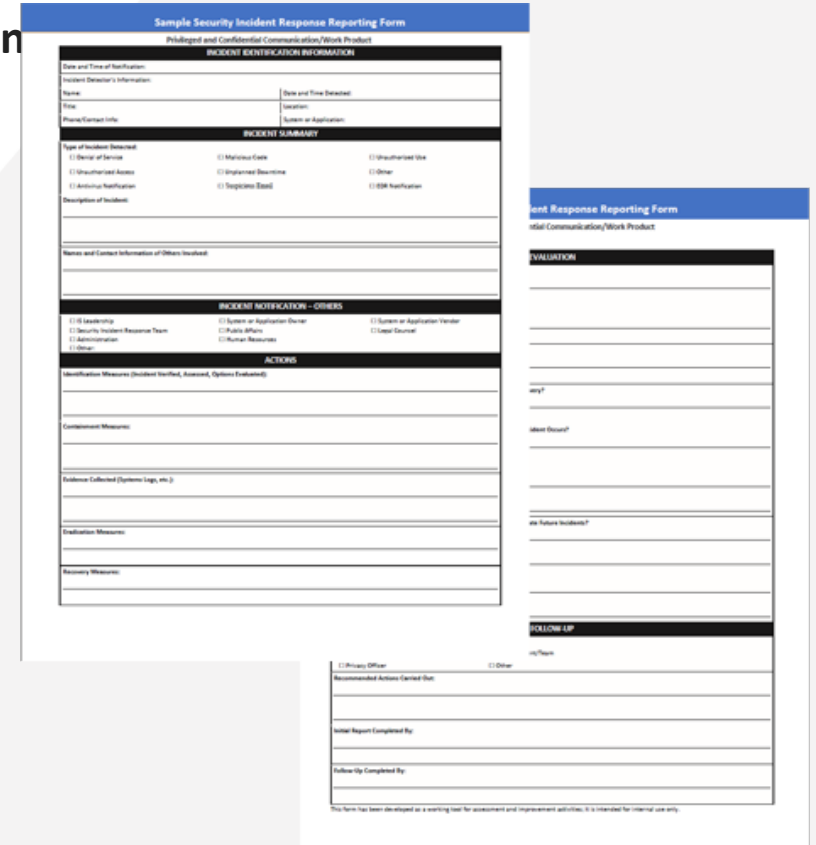

A short, guided conversation to help uncover vulnerabilities, assess current controls, and highlight opportunities for improvement.

### Ready-to-Use Incident Response Plan (IRP)

We'll provide a best-practice IRP template you can implement immediately — aligned with compliance standards and risk frameworks.

### Cyber Insurance Alignment

Expert advice to align with insurance requirements and optimize coverage.

The image displays a 'Sample Security Incident Response Reporting Form'. The form is titled 'Sample Security Incident Response Reporting Form' and includes a subtitle 'Incident and Confidential Communication/Work Product'. It is divided into several sections: 'INCIDENT IDENTIFICATION INFORMATION', 'INCIDENT SUMMARY', 'INCIDENT NOTIFICATION - OTHERS', 'ACTIONS', 'EVALUATION', and 'FOLLOW UP'. The 'INCIDENT IDENTIFICATION INFORMATION' section includes fields for 'Date and Time of Notification', 'Incident Detector's Information', 'Name', 'Title', 'Phone Contact Info', 'Date and Time Detected', 'Location', and 'System or Application'. The 'INCIDENT SUMMARY' section includes 'Type of Incident Detected' (with checkboxes for Denial of Service, Malicious Code, Unauthorized Use, Unauthorized Access, Impaired Availability, Denial of Service, Suspicious Email, and Other), 'Description of Incident', and 'Name and Contact Information of Others Involved'. The 'INCIDENT NOTIFICATION - OTHERS' section includes checkboxes for 'IT Leadership', 'Security Incident Response Team', 'Administration', 'Public Affairs', 'Human Resources', 'System or Application Owner', and 'Legal Counsel'. The 'ACTIONS' section includes 'Identification Measures (Quarantine, Isolation, System Forensics)', 'Containment Measures', 'Eradication Measures', and 'Recovery Measures'. The 'EVALUATION' section includes 'Was it a security incident?', 'Was it a data breach?', and 'Are there incidents?'. The 'FOLLOW UP' section includes 'IT/Security Officer', 'Recommended Action/Status', 'Initial Report Completed By', and 'Follow Up Completed By'. A footer note states: 'This form has been developed as a working tool for assessment and improvement activities. It is intended for internal use only.'
